

PRESS RELEASE

The Angelus Corporation Acquires CertifyNation

An aerospace design firm providing turnkey installation design, substantiation, certification and manufacturing solutions.

SUSSEX, WI (December 5, 2016) – The Angelus Corporation, an aerospace and defense products and services company, has announced the acquisition of CertifyNation, an engineering design firm located in Elmhurst, IL. CertifyNation will be joining PIC Wire & Cable® as a division of Angelus.

With decades of experience, CertifyNation specializes in the development of turnkey STC solutions and the delivery of installation kits for the global commercial aviation industry. The company focuses on avionics, equipment racks, connectivity, and in-flight entertainment systems.

CertifyNation will relocate to the Angelus global headquarters in Sussex, WI operating as a wholly-owned subsidiary of The Angelus Corporation. Scott Allan, President of The Angelus Corporation, said “CertifyNation complements PIC Wire & Cable and will help offer a natural extension of products and services to aerospace & defense customers. The CertifyNation team has a stellar working relationship with the FAA as well as aviation authorities and agencies overseas. I’m excited about the new solutions we can collectively provide to our customers.”

About The Angelus Corporation

The Angelus Corporation is a product and services provider to the aerospace and defense industries. PIC Wire & Cable is a global provider of aircraft cables, connectors and avionic assemblies with over 45 years of experience and a trusted reputation for its PICMATES® family of products. Together, the two companies aim to advance The Angelus Corporation’s mission to make its customers’ jobs easier. To learn more about The Angelus Corporation visit: www.TheAngelusCorp.com.
