

April 17, 2020

Dear valued customers and partners,

As the spread of COVID-19 continues and the associated policies protecting our citizens shift, we at The Angelus Corporation, parent company to PIC Wire & Cable and CertifyNation, are taking measures to mitigate the impact to our employees and customers.

We are continuing to adhere to all recommendations from the World Health Organization (WHO), U.S. Centers for Disease Control and Prevention (CDC) and our local authorities, focusing on the health of our staff as our greatest priority. These measures include:

- Prohibiting travel and visitors to our facility
- Increasing facility cleaning and disinfecting
- Reconfiguring office and production spaces to provide better social distancing
- Providing equipment for personal hygiene

As a supplier to essential sectors, our business will remain open with vital staff on-site to fulfill current and future product needs. The balance of our team has shifted to working from home and will continue to provide our customers with seamless service during this unprecedented time.

While we are continually monitoring for disruptions, our business has seen little impact to supply chain or service levels because of the pandemic. For this reason, we are continuing to offer standard lead-times for cable, quick-turn assemblies and kits, and development of STC Supplemental Type Certificates for aircraft modifications. As this situation evolves, we will continue to support open lines of communication with our customers and partners.

We sincerely appreciate your business and cooperation as we work to keep our employees healthy and customers satisfied. If you have any questions regarding our business activities, or need assistance with interconnect challenges or STC development, please contact our Sales Team at (262)-246-0500 or [sales@theangeluscorp.com](mailto:sales@theangeluscorp.com).

Thank you,  
John Lytle
